

Spark Radio for iPhone – Data Sheet

Spark Radio is the premiere streaming radio tuner for iPhone and iPod Touch and the only radio application to also include 8 graphic visualizers to enjoy while listening.

Huge Directory of Stations

Spark Radio supports over 10,000 radio stations worldwide and is adding stations all the time. Our inclusion of WMA support in April will triple that number to over 30,000 stations. Listen to music, talk radio, news, sports, public radio, and special programming from around the world.

Visually Stunning

Spark Radio has created 8 unique graphic visualizers which react to music and create mesmerizing and ever-changing animations. The animations are all touch sensitive so you can interact and play as you listen.

Access your Favorite Stations

Spark Radio provides an elegant interface and program guide to help you quickly find what you're looking for. Search for stations or programs by keyword, location, or simply enter the station URL if you don't find it in the directory. Browse all programming by genre or location. And while traveling you can find local stations based on your current GPS coordinates.

Bring it on the Road

Spark Radio is optimized for stream stability, so bring it with you in your vehicle. You can access over 10,000 stations and listen through your car stereo. Spark Radio offers a huge variety of radio content for a tiny price when compared to satellite radio.

Access the Web while Listening

Spark Radio has a built-in web browser to let you access email, Facebook, Twitter, or other sites while listening.

Join the Spark Radio Community

We've added number of social features to make radio listening more fun. Create a profile and see what others are listening to at the moment by using our interactive Globe Navigator. Find other listener's favorite stations and share your own. Rate stations and see who else is listening to any station in the directory.

Other Features

- Works with Wi-Fi, 3G or Edge networks
- Create your own directory of favorite stations for quick access
- View recently played songs
- Extensive station information including ratings & reviews
- Add your own station if you don't find it in the directory (MP3 streams only)

In Future Releases

- Import your own graphics or photos to customize the visualizers
- Listen in the background while running other applications
- Chat with other users who share your taste in radio programming
